

Wisconsin Heights School District **Technology Vision, Mission and Goals**

Vision

The Wisconsin Heights School District believes that it is essential to create an environment that is rich in technology, to support the successful application of knowledge, tools, and skills to solve problems using a variety of media to extend academic and occupational capabilities.

Mission Statement

The Wisconsin Heights School District's technology and library media mission is to adopt and infuse updated technology and media in the schools in order to improve learning, support positive changes in instruction, provide more efficient and effective means for accomplishing administrative tasks, and increase the frequency and quality of communication. In addition to the traditional role of promoting personal reading, the Library Media Center plays an indispensable role in our desire to create information and technology literate consumers. Our schools technology and media centers strive to support EC-12 curriculum and the Wisconsin Model Academic Standards. Our goal is to offer an information and technology literacy program that will provide all students with the knowledge and skills needed in the 21st century.

Goals

All students and staff will have access and exposure to a variety of devices during instructional times.

The Technology Committee will use staff input, data, and curriculum needs to make informed decisions on appropriate devices per grade level.

Technology will be used to foster and maintain school/community relationships through the school website, e-mail, social media, etc.

The district will provide high quality professional development to all staff which support classroom and professional learning.

The district will enhance network infrastructure, resources, and technology.
